

Programming and Statistics in Medical Device Investigations

Tuesday November 8th, 2022

Denksport Centrum Amersfoort, Amersfoort

(location and directions next page)

Price: €50

(to be paid cash or bank transaction at on-side registration, or invoice after the event)

Since the new Medical Device Regulation has come into effect, both the Medical Device companies as well as the companies that support them (like CROs) are struggling with the necessities for Medical Device clinical investigations.

At the event, you will get a general introduction of the changed landscape and three further presentations that will discuss concrete examples and challenges within programming and statistics in the setting of clinical research for medical devices.

Program

13:00	Registration, Coffee & Tea
13:30	Transition from MDD to MDR – The Key Changes Rianne Tooten (Clinical Research Professional)
14:00	Clinical Trials with Medical Devices - Examples and Challenges in Statistical Programming Mylène van Doorn and Fenna Hensen (OCS Life Sciences)
14:30	Coffee break
15:00	How do medical device trials specifically affect the programmers work Remco van der Meer (Medtronic)
15:30	Statistical Challenges in Medical Device Investigations Corine Baljé-Volkers (Clin-Q)
16:00	AOB and wrap up PSDM board
16:10	PSDM ANNUAL MEETING PSDM board
16:25	Networking drinks
